

Logan County

2023 NEP REPORT

Our Focus

The Kentucky Nutrition Education Program (KYNEP or NEP) encompasses two separate USDA programs: The Expanded Food and Nutrition Education Program (EFNEP) and the Supplemental Nutrition Assistance Program Education (SNAP-Ed). Both programs provide educational opportunities for limited-resource individuals and families to acquire knowledge, develop skills, and change behaviors for improved health and well-being.

Our Challenge

Poverty

According to U.S. Census estimates for 2022, the median household income in Kentucky is **\$59,341**, 21% lower than the U.S. median household income of **\$74,755**.¹ Kentucky also has higher percentages of overall and child poverty¹ and food insecurity² among its population compared to 2020 Census and Department of Agriculture estimates for the United States overall.

	KY	U.S.
Total Poverty¹	16.3%	12.6%
Child Poverty¹	20.6%	16.3%
Food Insecurity²	14.0%	10.2%

In 2022, an estimated **15.4%** of Logan County residents overall lived in poverty, and an estimated **19.5%** of children under age 18 lived in poverty.¹

Obesity and physical inactivity

Today, 6 in 10 Americans live with at least one chronic disease. These include heart disease and stroke, cancer, and diabetes.³ These diseases are all associated with obesity and physical inactivity. The most recent data show that the percentage of adults who have obesity in Kentucky is 37%,

ranking it in the top 10 states for high obesity rates in the country.⁴ The percentage of physically inactive Kentuckians is 29%, ranking it in the top eight most physically inactive states in the nation.⁴ A large amount of data shows that healthy eating habits and regular physical activity can help people achieve and maintain good health and reduce the risk of chronic disease throughout life.³

The County Health Rankings and Roadmaps Kentucky report shows that **40%** of Logan County's adult population have obesity and **32%** were physically inactive.⁴

Our Solution

Provide hands-on nutrition education to limited-resource audiences, focusing on:

- Buying and preparing healthy foods,
- Developing new meal planning and cooking skills,
- Adopting new healthy lifestyle behaviors, and
- Managing SNAP resources.

In 2023, 7,960 contacts were made with Logan County residents who participated in nutrition education programming.

Our Results

IN LOGAN COUNTY

Lifestyle improvements

In 2023, 93% of adult participants made a positive change in food group choices and 79% showed improvement in one or more food safety practices. In addition, 69% showed improvement in one or more food resource management practices and 69% made changes to be more physically active.

Our Success

Discover MyPlate with Adairville Elementary Cardinals

The Nutrition Education Program (NEP) strives to teach low-income households how to choose healthy food. There are more than 104,000 people with diabetes in the state between the ages of 3 and 21. The senior NEP assistant in Logan County taught MyPlate to kindergarteners and first graders at Adairville Elementary. She taught them how to choose healthy food. They also discussed how to stay active. The class met for an hour during the six weeks. Students gained knowledge in food groups and staying active. Students matched the Kentucky School Standards with site word books and student handouts. Students were asked to take home their booklets and recipe handouts to show parents what they had learned. After the program, 84% of students chose healthy foods more often.
